

Gloskil

Specialty Screen Additive

CONVENTIONAL

Always test ink on substrate prior to production run. Please refer to the MSDS for safety precautions.

Description: Gloskil is a flattening agent that has already been incorporated into a liquid. Therefore, no particulate material will be released into the air. The additive also has the added benefit of improving leveling, flow, and definition.

Features:

- Flattens Inks
- Ease of Application
- Improves Flow
- Compatible with most of Deco Chem's Ink
- Improves Leveling

Substrates:

- Metal
- Polycarbonate
- Glass
- Styrene Noryl
- Vinyl
- Plastic

Mixing: The Gloskil is so concentrated that some ink systems may require no more than 5% to achieve a dead flat. A high gloss ink may require 10 to 12%. *Some thinning may occur with the addition of Gloskil 3102, so it is recommended adding Gloskil 3102 prior to thinning.*

Compatibility: The Gloskil 3102 may be used in virtually any ink or coating system.

Storage: Ink should be stored in a metal container at room temperature (75°F). Inks previously used for printing runs should be stored in a separate container to avoid cross contamination. Ink has a minimum shelf life of 6 months from date of manufacture if the above guidelines are followed and there has been nothing added to the ink.

Sizes: 1 and 5 Gallon Pails or 30 or 55 Gallon Drums Available
